- UK (x3)
- Hungary
- Georgia
- Turkey

Asia

- Japan
- China (X2)
- Singapore
- Hong Kong
- India

America

- Canada.
- US (X2)
- Brazil

Africa

- Rwanda

Impact of covid-19 :

-  **58%** of the respondents answered that the covid-19 crisis has caused the demand for pro bono support by NGOs or social entrepreneurs **to either stay at similar levels or increase by up to 20 – 50 %**
-  For **79%** of the respondents, the covid-19 crisis has **resulted in more pro bono volunteers** being available to help (the number of volunteers available either stayed at similar levels or increased by up to 20 - 50 % and above)
-  For **82%** of the respondents, the covid-19 crisis has **resulted in maintaining or gaining new partnerships** (largely due to the quick adaptation of intermediaries to offer online pro bono formats & digitalize rapidly).
-  For **26 %** of the respondents, the covid-19 **has contributed in the cancelation of programs, public fundraising events & training resulting in revenue loss**

Impact of covid-19 :

The Covid-19 has shifted the practices of volunteering online and a lot of members were able to adapt using different tools & methods to continue offering pro bono missions.

Pro Bono will be crucial for sustaining the non-profit sector and helping carve a new type of society post covid-19 .

The Covid-19 has had an impact on finances and partnerships. It has contributed in a lot of uncertainty in terms of financial planning and how to understand the foreseeable future. On the long-run the intermediaries are uneasy about how pro bono will be viable with a slow economic activity.
